Symbols

ε -closure 112, 113
 example 113

A

ABNDM algorithm ... 163, 166, **168**, 170, 174,
 175, 182, 184
 example 168
 acyclic 177
 Advanced Aho-Corasick algorithm 54, 74
 Aho-Corasick algorithm **49**, 55, 74
 advanced 54
 complexity 50
 example 52, 53
 preprocessing 50
 approximate extended searching 175
 approximate matching **145**
 automaton 21, 150, 151, 174

B

Backward Dawg Matching algorithm
 *see* BDM algorithm
 Backward Nondeterministic Dawg Matching
 algorithm *see* BNDM algorithm
 Backward Oracle Matching algorithm
 *see* BOM algorithm
 BDM algorithm **28**, 80, 166
 related references 40
 BestFactor procedure 130
 Bison software 139
 Bit-parallelism 19, 45, 62, 63, 78, 117, 119, 122,
 131, 150, 152, 154, 158, 180
 block distance 184
 BNDM algorithm .. **29**, 63, 78, 80, 82, 84, 131,
 166
 example 32, 33
 multiple *see* multiple BNDM
 BNDM_Preproc procedure 133
 BOM algorithm **35**, **36**, 80
 example 37
 multiple *see* SBOM algorithm
 bounded length gaps 77, **81**

Boyer-Moore algorithm **22**, 54
 complexity 24
 preprocessing 24
 related references 39
 BPD algorithm .. **156**, 168, 174, 175, 180, 182,
 184
 example 157
 BPGlushkov algorithm **122**, 123, 137
 bit-parallel 123
 BPM algorithm ... **160**, 164, 168, 174, 175, 184
 example 161
 BPR algorithm .. **153**, 167, 168, 174, 175, 180,
 184
 example 153
 BPTompson algorithm 118, **119**, 123, 137
 example 120
 reducing space 119
 Build_AC procedure 52
 Build_Oracle_Multiple procedure 70
 BuildDFA algorithm 113
 BuildEps procedure 119
 BuildState procedure 113
 BuildTran procedure 123

C

classes of characters 77, **78**
 in the pattern 78
 in the text 80
 Commentz-Walter algorithm **55**, 75
 complexity 56
 Compute_pref procedure 126
 Compute_Reach procedure 133
 constant space algorithms 40
 context-free grammar 184
 CreateSuperp procedure 175
 CreateTree algorithm 166

D

deletion 145, 155
 DFA 111–113, 117, 118, 126, 151, 179, 180
 searching 114
 DFAClassical algorithm **115**, 137

- DFAModules algorithm 115
 diagonal 150, 153, 154, 180
 diagonal-wise bit-parallelism 154
 differences 145
 DP algorithm **149**, 152, 157
 dynamic multiple string matching 74
 dynamic programming algorithms ... **146**, 147,
 148, 150, 176
- E**
 edit distance 145, 146, 177
 EpsClosure algorithm 113
 example 113
 experimental map
 approximate searching 181
 multiple string 74
 regular expression 137
 single string 38
 experiments 38, 74, 137, 181
 extended string matching **77**
 Extended-BNDM algorithm 90, **93**, 96
 example 95
 Extended-Shift-And algorithm 90, **91**
 example 91
- F**
 factor oracle
 multiple string 69
 search 35, 70
 single string 34
 factor searching
 multiple string matching 42, **62**
 single string matching 16, 27, 34
 filtering 162, 170
 regular expression 125
 Flex software 139
 Four-Russians approach **151**, 178
- G**
 Gaps-BNDM algorithm 85
 example 87
 Gaps-Shift-And algorithm 83
 example 83
 Glushkov algorithm **109**, 122
 bit-parallel 122
 Glushkov automaton .. **105**, 111, 113, 115, 126,
 180
 example **108**, 125
 Glushkov construction. 102, 105, **109**, 122, 126
 complexity 110
 properties 109
 Glushkov_variables procedure **108**, 109
 graph 177
- H**
 Hamming distance 184
 hash table 60, 171
 hashing
 approximate searching 171
 multiple string searching 59
 single string searching 40
 hierarchical verification 164, **164**, 175
 Horspool algorithm **25**, 54, 80
 example 26
 multiple *see* Set Horspool algorithm
- I**
 insertion 145, 155
- K**
 Knuth-Morris-Pratt algorithm 16, **18**
 complexity 19
 preprocessing 19
 related references 39
- L**
 Levenshtein distance 145
 Lex software 139
 lmin procedure 126
- M**
 module 115, 117
 MultiBP algorithm 174, **175**, 182
 multidimensional text 184
 MultiFactRE algorithm 130
 MultiHash algorithm 171, **173**, 182
 MultiPEX algorithm **173**, 182
 multiple approximate searching 171
 multiple BNDM **63**, 138
 example 63, 65
 multiple Horspool algorithm
 *see* Set Horspool algorithm
 multiple pattern searching 96
 multiple Shift-And **45**, 62
 example 46, 48
 multiple string matching **41**
 regular expression *see* MultiStringRE
 algorithm
 MultiStringRE algorithm .. 126, **127**, 131, 133,
 138, 139
 example 127
- N**
 network expressions 179
 NFA102, 111–113, 116–118, 126, 139, 150, 152,
 166, 174, 177, 178, 180
 NFAModules algorithm 137, 139
- O**
 optimal path 147, 177
 optional characters 77, **87**
 Oracle-on-line algorithm 35
 Oracle_add_letter procedure 35
- P**
 Parse algorithm 139
 parsing 101, **139**
 example 140
 partitioning 163, 173

permutation 184
 PEX algorithm 163, **165**, 170, 173, 184
 example 165
 positive-length gaps 180
 Pref procedure 126
 prefix searching
 multiple string matching 42, **45**
 single string matching 16, **17**
 PROSITE 77, 81, 97, 179

R

regular expression **101**, 175, 179
 filtering 125
 regular expression matching 101
 regular expression parsing 101, **139**
 regular expression search 111
 RegularBNDM algorithm **131**, 133, 138
 example 134
 repeatable characters 77, **89**
 reversals 184
 Reverse.Arrows procedure 133
 row-wise bit-parallelism 152

S

SBDM algorithm 63, **68**, 69
 SBOM algorithm 63, **69**, 74
 complexity 72
 example 72
 Set Backward Dawg Matching algorithm
 *see* SBDM algorithm
 Set Backward Oracle Matching algorithm
 *see* SBOM algorithm
 Set Horspool algorithm **56**, 163
 complexity 56
 example 57, 58
 Set of regular expressions 139
 Shift-And algorithm 17, **19**, 78, 80, 82, 118
 multiple *see* multiple Shift-And
 Shift-Or algorithm 17, **19**, 78, 80
 complexity 20
 example 21, 22
 shortest path 177
 signatures 171
 string matching **15**

substitution 145, 155
 suffix automaton
 multiple string 68
 single string 28
 suffix searching
 multiple string matching 42, **54**
 single string matching 16, **22**
 Sunday algorithm **26**
 superimposed automata 174
 supply function
 Aho-Corasick algorithm 50
 factor oracle 34, 69

T

Thompson algorithm 102, **104**
 bit-parallel 118
 complexity 105
 example 105
 search 111
 Thompson automaton 102, 118
 example 105
 properties 104
 Thompson construction 102
 Thompson_recur procedure 104
 tree representation 101, 108, **139**
 trie **44**, 50, 55, 69
 Trie algorithm 44

U

unbounded alphabets 76

V

Verify procedure 175

W

wild cards 89
 Wu-Manber algorithm **59**, 74
 example 61

Y

Yacc software 139
