

Jam-pack your Kindle, iPad, Android, Nook, or any device, full of amazing books with your own e-GO! Library. At your leisure pick your favorite titles from a wide array of categories for all tastes. Total speed, convenience & mobility are yours. Your e-GO! Library is an innovative way “to have & hold” a fresh and plentiful supply of great titles. It’s seemingly endless entertainment without the need for the internet or downloading! All in a preloaded, USB memory flash drive which puts a thousand of today’s best books in your pocket!

Enjoy Anywhere Anytime!

- ✓ **CONVENIENCE** of Preloaded USB flash drive
- ✓ **FORMATS** for ALL eReaders & Mobile Devices
- ✓ **NO** need for Wi-Fi or Internet
- ✓ **AVOID** Downloading
- ✓ **SAVE** Tons of Time & Effort
- ✓ **PERFECT** for Travel
- ✓ **FUN** for the Whole Family
- ✓ **MAKES** a Great Gift

9. THE ACTUAL SECRET OF
THE JOURNEY OF THE SOULS
10. FEEDBACK AND RESPONSE

WHO WHAT WHEN AND WHERE OF HINDU MYTHOLOGY

Hinduism is a religion that existed in Ancient Times alongside the Egyptian religion and is still existing and thriving. Hindu mythology is therefore our key to understanding the level of scientific development, lifestyle and social behaviour of the Ancient humans. Luckily for us, Hindu mythology provides this information in great details. Hindu mythology is our window into the Ancient world as it existed, as well as their understanding of the world around them. While the stories of the Ancient times are still intact in Hindu Mythology, over the years we seem to have lost the perspective in which these stories were told. In this book, one by one we will untie the knots and understand this lost perspective in order to understand our own origins, our lost sciences and our lost perspective.

For anyone who has ever wondered why our mythology gives such detailed descriptions of vimanas/ aeroplanes and nuclear bombs when according to modern science aeroplanes were invented by the Wright Brothers, and humans were hunters and gatherers at the time when these technologies were supposed to have existed or anyone who has ever been curious about what and why do we practice the rituals that we do in Hinduism, this book is an attempt to bridge the gap between mythology and modern history.

There are aspects of our modern day recorded History which the Historians themselves are unable to explain. According to History as it stands today, humans were hunters and gatherers/ nomads for a very long time and then all of a sudden two great civilizations i.e Indus Valley Civilization and Egyptian civilization, came into existence whose origins are still a mystery to all historians, this evolution from hunters and gatherers to all of a sudden developing great civilizations with advanced technology and skills is the page that is missing from present day recorded history. This page lies hundreds of feet underwater across various places around the globe and was discovered in 2002.

In 2002 Indian oceanographers discovered two cities, the size of Manhattan, off the Gulf of Khambhat, lying 100 ft under water (these cities are different from the much discussed discovery of city of Dwarka discussed by popular media) (For more information goto the website www.wikipedia.com and in the search window type the following word WITH THE INVERTED COMAS “Marine Archaeology in the Gulf Of Khambhat” or click on the following link

http://en.wikipedia.org/wiki/Marine_archeology_in_the_Gulf_of_Khambhat) .

The most interesting part of this discovery is that the only time this land; where the cities have been discovered; was above the sea was before the last Ice Age (For more information Goto the website www.youtube.com and in the search window type the following words WITH THE INVERTED COMAS “Flooded Kingdoms of the Ice Age: Graham Hancock” or else click on the following link <https://www.youtube.com/watch?v=xiI8947yhD4> please see this link Graham Hancock famous British researcher visits the underwater sites). Now if we go by the description of modern history as it stands

today, then during the last ice age humans were merely hunters and gatherers and could not have built any cities, especially not two cities, the size of Manhattan as have been found in the case of the submerged cities of Dwarka.

The significance of this discovery is manifold for Hindu mythology, as well as for world history and mythology, because all across the world there are many of flood myths like Noah's Ark and the myth of Manu, that describe how great floods had taken place on earth and thereafter, the survivors of the floods struggled to re-establish human civilization again on the planet. These flood myths are spread across the globe and across the cultures including Asia, West Asia, Africa etc. West Asia and Europe have the Sumerian Creation Myth, Gilgamesh Flood Myth, Genesis flood narrative of Noah's Ark, Classic Antiquity has Ancient Greek Flood Myths, Irish Flood Myths, Finnish Flood Myths. Many African cultures have an oral tradition of a flood myth including the Kwaya, Mbuti, Maasai, Mandin and Yoruba peoples, many such similar flood myths have been passed down through generations across the globe.

If you goto www.wikipedia.com and search for the "List of Flood Myths" you will come across this elaborate list of the various civilizations around the world whose mythological stories give details about these great floods :-

Wikipedia "List of Flood Myths" :-

- **1. West Asia and Europe**
 - 1.1 Ancient Near East
 - 1.1.1 Sumerian
 - 1.1.2 Babylonian (*Epic of Gilgamesh*)
 - 1.1.3 Abrahamic religions (Noah's flood)
 - 1.2 Classical Antiquity
 - 1.3 Medieval Europe
 - 1.3.1 Irish
 - 1.3.2 Norse
 - 1.4 Modern era folklore
 - 1.4.1 Finnish

- **2. Africa**

- 3. Asia-Pacific**

- 3.1 India
- 3.2 Central Asia/Turkestan
- 3.3 China
- 3.4 Korea
- 3.5 Malaysia
- 3.6 Tai-Kadai people
- 3.7 Philippines

- 4. Oceania**

- 4.1 Polynesia and Hawaii

- 5. Americas**

- 5.1 North America
- 5.2 Mesoamerica
- 5.3 South America
 - 5.3.1 Canari
 - 5.3.2 Inca
 - 5.3.3 Mapuche
 - 5.3.4 Muisca
 - 5.3.5 Tupi

However, when our present day History was being written about 100-200 years ago, we did not have the advanced technology; which we have today and hence the historians had no means to check the veracity of these flood myths. These flood myths were therefore dismissed and set aside and our present day history was written on the basis of what we could see around us above the sea surface.

This is how this deep divide between present day history and mythology came into being.

However, the discovery of these cities underwater is a proof of the fact that the stories narrated in our mythology are indeed true and that there was a civilization before the present day human civilization which had the advanced technologies described in the Hindu mythology and were adept at using these technologies, some of the technologies described in our mythology are even more advanced than the technologies we are using today. But as we are well aware of the situation here in India, the site was worked upon for hardly a couple of years and hardly any work has been done on the site since 2004.

Nonetheless, having received this precious piece of information, we have found the missing perspective in which our mythological stories have been told. These major cataclysmic events across the globe are also what is called the Yuga cycle in Hinduism, yugas are actually ice-ages/ages, according to Hindu mythology there are “4 yugas” i.e 4 times when the human civilization will develop, spread and again go down in floods or natural cataclysmic events and the surviving humans will have to start civilization all over again. According to Egyptian mythology there are “5 suns” i.e 5 times the sun will hide for the longest time after the cataclysmic natural events after the ice ages/ages and human race will again have to start all over again and build a new civilization from the scratch. There are also Ancient records to say that end of each yuga was not necessarily by floods and that each time one of the ‘five elements’ may have played a role in ending civilization.

Our Ancient Hindu texts are actually the invaluable knowledge of the sciences, life and religious beliefs of this Ancient Civilization passed down to us by the survivors of these great floods.

So, now to give the answer of Who, What, When and Where of Hindu Legends/Mythology :-

1. WHO were these people mentioned in the Hindu Legends :-

These were the people who existed on this planet before the end of the Last Ice Age.

2. WHEN did these people mentioned in the Hindu Legends exist:-

The existence of these Ancient people on the planet ENDED some 12,000 years ago around 10,000 B.C when the Polar Ice Caps melted after thousands of years of their existence and development of their civilization. These people, however, lived on this planet for a lot longer than 12,000 years ago.

3. WHERE did these people mentioned in the Hindu Legends exist :-

They existed in the areas around India highlighted in the map below in Red colour. Remember, over here we are only discussing the period from Dwarka onwards (Dwapar Yuga). The historians are yet, to make discoveries about the Ayodhya period (Treta Yuga) of human history.

4. WHAT are these miracles and Gods discussed in Hindu Legends :-

We shall now discuss the contents of these legends given in the Hindu Mythology.

There are two aspects of the Hindu legends that we do not understand today:-

1. Miracles or the **ANCIENT SCIENCES** mentioned in the Ancient Hindu Texts
2. The Gods whom these Ancient people were frequently in contact with

We shall therefore, now discuss these Ancient Sciences in the next part.

AREAS THAT WERE FLOODED AT THE END OF THE LAST ICE AGE (In Red)

(Notice the area where submerged city of Dwarka has been found also went underwater at the end of the last ice age)

I bow to Lord Ganesha.

ANCIENT SCIENCES: EVERYTHING EXPLAINED

"The day science begins to study the non-physical phenomenon, it will make more progress in one decade than in all the previous centuries of its existence".- Nikola Tesla

Mr Nikola Tesla is the scientist, engineer and inventor who has been credited with discovering almost the entire twenty first century, that we are living in now. Everything from Rotating magnetic field, AC motor, Tesla coil and Radio to the concepts of the mobile phone and X-Rays, he is credited with having discovered almost the entire 21st Century. Now when this genius tells us in his quote that "The day science begins to study the non-physical phenomenon, it will make more progress in one decade than in all the previous centuries of its existence".

The question that immediately crops up is, what exactly does Mr Tesla mean by the term “non-physical branch of sciences”? What are these sciences that can push the entire human civilization forward by hundreds of years.

The answer is, this non-physical branch of sciences, are the sciences that were practiced by the Ancient Civilizations that existed before the last Ice Age.

So now the question that arises for our consideration is what is this non-physical branch of sciences, how these Ancient people got to know about this non-physical branch of sciences and when did they develop it. Well, here's the news, while we did not have the advantage of modern day technology back in days when our present day history was being written, our present day technological endeavours deep into the sea are revealing remnants of Ancient civilizations that existed around the world and were flooded by sea water at the end of the last ice age when the snow caps melted. The flood myths like Noah's Ark are a result of these large scale floods that occurred at the end of the last Ice Age and the Ancient Texts that we carry with us today are the remnants of the knowledge of this Ancient Civilization passed down to us by the survivors of these catastrophic floods. (For more details on this submerged Ancient Civilization, please watch the youtube video "Underworld Flooded Kingdoms of the Ice Ages" by Mr Graham Hancock <https://www.youtube.com/watch?v=Va0BIqfzpvo>). The knowledge of this ancient sub-merged civilization is common knowledge now. I would only like to add some of my observations here with respect to these sub-merged civilizations, firstly, the reason our historians seem to have conveniently ignored the 'Flood Myths' recorded in the mythology of several civilizations around the world is because back in the 18th and 19th century when our present day view of History was being written by our gramophone listening scholars, they did not have the technology to go deep into the ocean and scan the ocean floors to check the veracity of this information. However, now that we have the technology, our present day historians/scholars need to be quick in adapting to the revolutionary changes in these centuries old 'established ideas'.

Secondly, in my opinion in addition to these sub-merged civilizations there were some civilizations that were located inland at the time of

these 'Great Floods' at the end of the last Ice Age. These civilizations like Indus Valley Civilization, some Native American civilizations and the Ancient Egyptian civilization with their cities located inland managed to escape the direct catastrophic effects of the Great Floods but had to deal with the drastic weather changes that accompanied the Great Floods. The rain water marks on the Sphinx in Egypt being a case in point, and therefore, these civilizations are actually a lot older than they are believed to be. The cities of these civilizations are the inland remnants of the civilizations that existed before the last ice Age.

Thirdly, I would like to point out that the best source to study the culture, sciences and beliefs of Ancient Civilizations that existed before the last Ice Age, available with us today are the Ancient Hindu texts. These Ancient Hindu texts are the knowledge database of this Ancient Civilization that was passed down to the survivors of the floods, as would be the case with any large scale catastrophic scenario; the survivors of the catastrophic event tried to preserve their knowledge for the generations to come in the form of these Ancient Hindu texts. Hinduism is the only religion that existed alongside the Egyptian religion and is still existing and thriving; we therefore don't just have the records of the Ancient Texts of Hinduism well preserved and available to us today after thousands of years, we actually have people who are practitioners of these Ancient Sciences given in these texts and can share their experiences with us. One such sub-merged city, a remnant of this Ancient Civilization that existed in India, namely the sub-merged city of Dwarka, a more than 12,000 year old city has been found off the coast of Gujrat in India, these are twin cities measuring about 7-8 kms each lying some 100 feet below sea waters.

For any civilization that existed more than 12,000 years ago to develop 7-8 km long twin cities, there has to be some form of sciences that these people were following, however, we don't see any technical equipments, any machinery that was being used by these

people that can give us an idea about the level of development of their sciences.....

.....Is it possible that the sciences that these people were following was very different from the sciences that we understand today, that these Ancient sciences were non-physical in nature and that's why we can't find any physical proof or remnants of these sciences?

Now, to elaborate upon the quote by Mr Nikola Tesla regarding the non-physical branch of sciences, our scientists have recently come up with a principle called the " Holographic principle" a principle which basically states that the entire physical world around us is only a hologram, i.e. the physical world around us is not real, as against this, Ancient Hindu texts have been telling us since thousands of years that the whole world around us is just "Maya" i.e. the physical world around us is not real therefore to put it across with the help of an example both our present day sciences and our Ancient wisdom are telling us that we are living in a world that is not real and it is more like living inside a simulation or a video game. Now if we are living inside a video game then what our present day sciences (let's call them the Physical Branch of sciences as against the Ancient Non-physical branch of sciences) are doing by breaking down the atoms into protons, neutrons, electrons and further breaking down the particles into quarks is equivalent to a character inside a video game trying to understand his reality by breaking down the pixels inside the video game.

As against this physical approach of present day sciences the Ancient people followed the non-physical branch of sciences that Mr Nikola Tesla is talking about in his quote. While our scientific knowledge of the physical world around us today comes down to breaking down the neutrons, protons and electrons into quarks, our sciences stop at this

point and we have not yet managed to explain the vacuum or the empty space that exists between these particles. As against this the knowledge of these Ancient Sciences starts from this vacuum or empty space between the particles and dismisses all the atoms and molecules around this empty space as Maya or an illusion.

The Ancient Rishis/Yogis and Monks were actually practitioners/scientists who were following this non-physical branch of sciences and that is why our present day sciences are unable to explain some of the miracles performed by these Ancient Rishis and Monks even today. Now what these Ancient Rishis did was they detached themselves from the physical or the holographic world around them and went and sat on mountain tops and inside caves and they in a manner reverse engineered the human psyche/the human soul (Consciousness) and found a way to reach back to the Maker/God of this physical world. They reverse engineered the human Consciousness the way today we see our scientists and our engineers reverse engineer a technological product. Similarly these scientists (Ancient Rishis/Yogis and Monks) reverse engineered the human being (human consciousness) to reach back to the maker and they did this with the help of yoga and hence they tried to understand the reason for the creation of this hologram and the influence that the factors within this hologram have on the human being and more importantly What is the purpose of human life in experiencing this simulation or video game.

Now to give you an idea about how advanced the knowledge of this Ancient Civilization was,

An example of the knowledge of the balance of nature in these Ancient times is given in *Devistotra*. A Hindu Shashtra as thus :-

*So long as this land,
Will have mountains, forests and pastures
That long will the Earth survive,
Sustaining you and the coming generations.*

An examples of their knowledge of the origins of life in the Ocean can be found in the Atharva Veda

This earth, our mother, has nurtured consciousness from the slime of the primeval ocean billions of years ago and has sustained the human race for countless centuries. Will we repay our debts to our mother by converting her into a burnt out cinder circling the sun into eternity?

- Atharva Veda 12.1.26, 28

To quote from Sankshipt Bhavishya Puran about the extent of Ancient people's knowledge of the Universe, a more than 5000 year old Hindu Text, Chapter One of this Sankshipt Bhavishya Puran, Brahmparva, says

Sankshipt Bhavishya Puran- Chapter 1- (5000 year old Hindu Text)

Brahmparva- *"Poorva Kaal mein sara sansaar andhkaar se vyapt tha, koi padaarth drishtigat nahi hota tha"*- **In the beginning this Universe was in a state of darkness, and we could not see any element"**

"In the beginning this Universe was in a state of darkness and we could not see any element." Now don't our sciences today tell us that the Universe was in a dark dense state in the beginning? After reading these lines in a 5000 year old Hindu text, are we being rational in trusting anyone who tells us that the Ancient Civilizations had little or no knowledge about the Universe around them?

Further, there is presently a controversy among modern scientists, there is a debate about the end of the Universe about whether, (a) The Universe will keep expanding till infinity, (b) The Universe will contract after a point of expansion (c) An equilibrium will be reached and then the expansion of the Universe will stop. Now, i am going to give you some information given in the Mundaka Upanishad, this is again a thousands of year old Hindu text, now it says,

- “Angirā says, ‘यथोर्णनाभिः सृजते गृह्णते च’ –
‘Yathornanābhihi srujate gruhnate cha’ (Mundaka Upanishad: 1/1/7). *Urnābhi* means a spider. *O disciple! Just like a spider creates threads and makes a web, and when it desires it swallows it back, in the same way creation is made from Akshar.*” (*Akshar here means AUM*)”

Akshara or Word over here means AUM which means God (God in Sound Form) therefore, the answer to this puzzle as assessed by these Ancient Scientists in this thousands of years old text Mundaka Upanishad would be point (b) of the above debate.

Now in relation to this, i want to relate an incident from the life of Albert Einstein, though not a firm believer in God Himself Einstein did believe that there was a creator of this intelligent design of the Universe. Once; a friend of Einstein who did not believe in God and used to have frequent discussions with Einstein about it; visited Einstein. He saw a model of the solar system lying on a desk in front of Einstein. The friend asked Einstein “Who made this model?”, Albert Einstein said "No one" and then the friend asked again, “Who made this model?” Albert Einstein again replied, that no one had created the model of the solar system, then when upon asking for a third time, Albert Einstein gave the same reply, the friend got irritated and said "if no one created this model then how come it is lying on your desk". Albert Einstein's reply to this was, "You cannot believe

that the small model of the solar system lying on my desk has no creator and you want me to believe that the original solar system has none!".

See, this is the main difference between the Ancient Scriptures and modern Sciences, the Ancient Scriptures acknowledge the fact that there IS a creator, and explain everything from that perspective whereas modern sciences are still looking for a creator.

In addition to this, let's go back a little and consider the opinions of the people who are the founders of our modern day sciences and some of the greatest minds in our modern day Sciences and consider their opinion on these Ancient Hindu Texts.

In the 1920's quantum mechanics was created by the three great minds Heisenberg, Bohr and Schrödinger, who all read from and greatly respected the Vedas. They elaborated upon these ancient books of wisdom in their own language and with modern mathematical formulas in order to try to understand the ideas that are to be found throughout the Vedas, referred to in the ancient Sanskrit as "Brahman," "Paramatma," "Akasha" and "Atman." As Schrödinger said, "some blood transfusion from the East to the West to save Western science from spiritual anemia."

Heisenberg stated, "Quantum theory will not look ridiculous to people who have read Vedanta."

Schrodinger wrote in his book *Meine Weltansicht*:

"This life of yours which you are living is not merely a piece of this entire existence, but in a certain sense the whole; only this whole is not so constituted that it can be surveyed in one single glance. This, as we know, is what the Brahmins [wise men or priests in the Vedic tradition] express in that sacred, mystic formula which is yet really so simple and so clear; *tat tvam asi*, this is you. Or, again, in such words as "I am in the east and the west, I am above and below, I am this

entire world.”

“There is no kind of framework within which we can find consciousness in the plural; this is simply something we construct because of the temporal plurality of individuals, but it is a false construction... The only solution to this conflict insofar as any is available to us at all lies **in the ancient wisdom of the Upanishad.**” (Mein Leben, Meine Weltansicht [My Life, My World View] (1961) Schrodinger, Chapter 4)

The famous Danish physicist and Nobel Prize winner, Laureate Niels Bohr (1885-1962) (pictured above), was a follower of the Vedas. He said, “I go into the Upanishads to ask questions.” Both Bohr and Schrödinger, the founders of quantum physics, were avid readers of the Vedic texts and observed that their experiments in quantum physics were consistent with what they had read in the Vedas.

Fritjof Capra, when interviewed by Renee Weber in the book *The Holographic Paradigm* (page 217–218), stated that Schrödinger, in speaking about Heisenberg, has said: “I had several discussions with Heisenberg. I lived in England then [circa 1972], and I visited him several times in Munich and showed him the whole manuscript chapter by chapter. He was very interested and very open, and he told me something that I think is not known publicly because he never published it. He said that he was well aware of these parallels. While he was working on quantum theory he went to India to lecture and was a guest of Tagore. He talked a lot with Tagore about Indian philosophy. Heisenberg told me that these talks had helped him a lot with his work in physics, because they showed him that all these new ideas in quantum physics were in fact not all that crazy. He realized there was, in fact, a whole culture that subscribed to very similar ideas. Heisenberg said that this was a great help for him. Niels Bohr had a similar experience when he went to China.”

Robert Oppenheimer (1904 – 1967) learned Sanskrit in 1933 and read the Bhagavad-gita in the original, citing it later as one of the most influential books to shape his philosophy of life, stating that “The Vedas are the greatest privilege of this century.”

Upon witnessing the world’s first nuclear test in 1945, he instantly quoted Bhagavad-gita chapter 11, text 32, “Now I am become death, the destroyer of worlds.”

Mr Nikola Tesla’s association with Swami Vivekananda and his Vedanta philosophy is well known, Mr Tesla in fact was so influenced by Swami Vivekananda’s philosophy that he started using Vedantic terms like Prana and Akasha to describe world around him.

Vedic texts such as the Bahgavad-gita and the Upanishads were collectively considered the most influential books ever written by eminent people like Thoreau, Kant, Schopenhauer, Schrödinger, Werner Heisenberg , Tesla, Einstein etc.

After reading these quotations from some of the greatest minds in our modern day sciences, we need to ask ourselves, are we being rational in dismissing the sciences of these Ancient Texts off hand?

A likely explanation for dismissing these Ancient texts could be that while the Sciences recognized the potential of the information provided in these texts, they dismissed them since in the light of our present day History there is no way to explain where these undeveloped Ancient People could have gathered this information from.

Well, now in the light of the recent discovery of these Ancient submerged cities, our History as well as our Sciences must stand corrected.

Now the question that arises for our consideration is, if these Ancient people knew so much about the Universe around them, what were the

techniques, tools at their disposal to help them understand/research these things?

The miracles described in the Ancient texts and mythological stories are the Sciences of these Ancient People. We gather from the Ancient Hindu texts, that these Ancient people had divided their sciences into two categories, firstly the "Mayavi shaktiyan/powers" and the "Adhyatmic Shaktiyan/powers". Mayavi Powers being powers derived from Maya. Maya has been defined in the Ancient Hindu scriptures as everything around us, everything the five senses can notice, natural as well as manmade. So the powers which we derive from natural resources, or manmade technology, those are all Mayavi Powers. The second branch of sciences, the Lost branch of Sciences i would say that exists today in these Ancient texts is the knowledge about the Adhyatmic shaktiyan or the Adhyatmic powers, as the word itself explains "Adhya" comes from the word Adhyan meaning "the study of or to study" and Atmic means Atma (soul), means the powers derived from the study of the Soul, so these are the powers derived from the soul. These are the sciences of our soul interacting with things around us. So these are the powers, the magical powers that are referred to in our mythological stories, which we do not understand today.

We come across various magical powers described in Ancient Hindu mythological stories like Trikaal Darshi Rishis (Rishis/Yogis who could see the past, present and future) stories about Rishis/Yogis like Maharishi Valmiki and Rishi Vashisht who are said to have had these powers of seeing the past, present and the future. There are also stories about Yogis who could go anywhere at the speed of thought, like Lord Parashurama.

So to give you a practical example, in today's terms if I was to explain these sciences, some of us in our dreams we see the future, sometimes we have premonitions about something that is going to happen to us you know. Sometimes we have telepathy about for example something good that is going to happen to our near and dear ones. We

just get this intuition, this feeling that something is going to happen. Now a lot of our modern scientists have over the centuries made unsuccessful attempts to make a time machine and yet modern day sciences have not yet developed a time machine, but then how come we in our dreams move forward in time and see what is going to happen to us. Almost everyone of us has at some point in our lives had a dream where either directly or in a symbolic manner we have seen some event that is going to happen in our future. See, THESE are the powers lying dormant in our soul today. This is the lost branch of sciences that Ancient Hindu texts contain within them today. While these sciences were known to various civilizations across the world before the last ice age, the Hindu texts contain the detailed working and application these sciences and due to the benefit of an unbroken tradition of practicing these sciences, we also have yogis and rishis even today who are practicing these sciences. These are the powers of the soul, the power to go into the future and see what is going to happen. When a Rishi/Yogi tapped these powers and meditated upon it and developed it further, that is when then Rishi was called a Trikal Darshi Rishi i.e a term used for a Rishi/Yogi who could see the past, present and the future at will. These are the kind of powers that are lying dormant in our soul, that we are carrying within us everywhere, we have only lost the sciences of developing these powers.

Now let's discuss the practical yogic techniques at the disposal of the Ancient people to develop these Ancient sciences.

The way our present day sciences do everything for us, from curing diseases to reaching out into space to go to other planets similarly the Ancient yogic practices were the "*YOGIC SCIENCES*" of this Ancient civilization and these yogic sciences just like our present day sciences were developed to an extent where they had varied applications from improving the physical health of a person, to improving the person's psychological health and to even launching a person into space with the help of a technique popularly referred to as

the technique of “*Astral Body Projection*”. Astral Body Projection is a technique that is well documented in Ancient Hindu Texts and is a technique with the help of which a human can travel to the ends of the Universe in your astral body or cosmic body form while leaving the physical body behind on earth and therefore such human is free from the physical limitations of food, water and oxygen etc. which are the major challenges faced by humans in travelling to planets outside earth today.

In addition to this, these Ancient people also seem to have built Vimanas or Airplanes, at least 20 passages in the Rigveda (1028 hymns to the gods) refer exclusively to the flying vehicle of the Asvins. This flying machine is represented as three-storeyed, triangular and three –wheeled. It could carry at least three passengers. According to tradition the machine was made of gold, silver and iron, and had two wings. With this flying machine the Asvins saved King Bhujyu who was in distress at sea

American intelligence agency CIA has performed several documented experiments on these Ancient techniques of Astral Body Projection and remote viewing (https://en.wikipedia.org/wiki/Remote_viewing)

Even today we have several Yogis in India who know and practice these techniques on a regular basis, one of them being Bapuji Dashrathbhai Patel who has the power to see the past, present and the future as well as the power to do Astral Body Projection. He explains these techniques and all the knowledge that He has gained from such travels on His YouTube channel “Bapuji Dashrathbhai Patel”

Trying to understand these Ancient Sciences without understanding the concept of the ‘Soul’ or Atma as its called in Hindi language, is like trying to understand our modern sciences without understanding the concept of an Atom. (Coincidentally both Atom and Atma are similar sounding words). We need to ask ourselves, in not acknowledging the existence of the soul, just because our present day sciences have not yet verified the existence of the soul, which is

practically the cornerstone of all the religions and civilizations of this Ancient world, are we making the same mistake that the scholars writing our present day interpretation of history made some two centuries ago in not acknowledging the existence of the pre-Ice Age civilization only because they did not have the technology to scan the ocean floors?

The description of heaven and hell given in the Ancient Texts of religions almost across the board in all religions around the world are actually the descriptions of planets where the human soul is born again and these are the planets that were visited by these Ancient people in their Astral body form and it is these planets that have been described to us as heaven and hell. Which planet the human soul will be born in again is based on the Karma that we do on this planet and that is precisely the reason why all the various religions from around the world focus on peace and love and goodness in your heart because they want your soul to be born into a better planet and not on a worse planet, because these Ancient people had understood the sciences of the soul and karma. So, the good news is we are not here to just grow old and die on this planet, the story goes on for a very very long time. Hindu Vedas and Puranas (Ancient texts) give the descriptions of 14 Lokas (14 Star systems) where the soul is reborn in great details and explains about the life and circumstances that exist in each of the Lokas.

Moving on, while some of the Monks and Rishis living in Ashrams and Mountains and Monasteries are still aware of these sciences, two people namely Dr Steven Greer (An American doctor) and Mr Gregg Braden (An American scientist) have managed to bring out these sciences from the Ancient books and monasteries and brought these sciences out to the public, so we can sit at home comfortably and watch the youtube videos by these two great gentlemen explaining the Ancient Sciences to the public at large. Both these gentlemen are masters of two different aspects of these Ancient Sciences, though if

these two work together, they can perform miracles in bringing forward these sciences.

Now, to give the readers another example about the scope of these sciences and the extent to which these sciences had been developed by this Ancient Civilization. The great scientist Dr Jagdish Chandra Bose, the Indian scientist who discovered that plants have life in them, stated that he started experimenting with plants because as a kid whenever he would hurt a plant, his mother would scold him and tell him that plants have life in them and that he should not hurt a plant. So where did his mother get this information from? She obviously got to know that from the Ancient Scriptures,

This information was a part of common knowledge in India even before it was scientifically proven.

Rishi/Sage Bhrigu explains to Bharadvaja in Chapter 184 of the Shantiparva how plants have life or in other words soul as thus :-

“the plants feel pain and pleasure and there is growth where there is a cutting. These facts prove that plants have life or Chaitanya (consciousness). It is hence that water given to the plants is taken in by them and the fire within them enables it being digested and thus stickiness and growth result.”

As far as the duration of development of these sciences by the Ancient people is concerned, i would like to add that it is my strictly personal belief that as against around 5000 years of development of our present day human civilization, out of which we have only spent some 400 years developing our sciences (400 years since the apple fell on Newton's head). This Ancient civilization survived on earth for at least twice or thrice as long as our civilization and had that much more time to develop their sciences. These sciences are thus thousands of years ahead of us.

To give a few examples of the advanced state of development of these Ancient sciences. What is a little known fact today, is that it is not just plants that are conscious living beings, Hindu Ancient Scriptures also tell us that the entire planet is a conscious living being, that is why it is called Dharti Mata or Mother Earth, the Sun is a conscious living being and that is why it is called Surya Devta or the Sun God and is worshipped by so many Ancient Civilizations from around the world. Infact, all the planets, stars and the entire Universe around us is a Conscious Living Being and the Hindus worship the Universe as Lord Krishna. The idea of a “living universe” is not an unknown concept. More than two thousand years ago, Plato described the universe as thus :-

“a single living creature that encompasses all living creatures within it. In this view, we live within a living system of unfathomable intelligence, subtlety, power, and patience. In turn, we appear to be evolving expressions of that living universe, infused with a knowing capacity or consciousness, and with an existence that is largely non-material in nature.”- Plato”
(www.scienceofnonduality.com)

In the summer of 2011, Dr. Matloff a major figure in what might be called the ‘interstellar movement,’ an Emeritus Associate Professor and Adjunct Associate Professor in the Department of Physics at New York City College of Technology as well as Hayden Associate at the American Museum of Natural History. delivered a paper in London at the British Interplanetary Society’s conference on the works of philosopher and writer Olaf Stapledon, the author of Star Maker (1937). One of Stapledon’s startling ideas was that stars themselves might have a form of consciousness. Greg’s presentation went to work on the notion in light of anomalous stellar

velocities and asked what might make such an idea possible. (Ref.<http://www.centauri-dreams.org/?p=23203>)

The Ancient Rishis had developed methods with the help of which they could communicate with these planets and stars at the level of Consciousness and some people like Dr Steven Greer know this technique even today and in one of his Youtube videos he tells us about a dialogue he had with Mother Earth.

This is also the reason why if you jog your memory a bit, the Greek and the Roman mythology is full of stories about the planets of our solar system, like Uranus, Mars , Venus, These people knew the art of communicating with the planets at the level of consciousness.

In addition to this, the Ancient Scriptures also say that our Universe is based on sound and vibrations and that is precisely the reason why Mantras are recited. A lot of attention is traditionally paid to the tonality and the sound at time of reciting the Mantras. The Vedic mantras are divided into three categories; there is a separate category of priests that are allotted to chant each type of mantra. There is a category of priests who are supposed to say a mantra in a high tone and vibration, there is a separate category of priests that are supposed to say a mantra in a medium tone and vibration and then there is a different category of priests that are supposed to say a mantra in a low tone and vibration. That is how much importance is given to the sound and the tone of the mantras and the reason for this is that the Ancient people knew that the Universe is made of sound and vibration.

As far as the vibrations of the Universe are concerned in the perspective of modern day sciences we can relate to the “*String Theory*”. In simple words String theory would mean:.

“String theory depicts strings of energy that vibrate, but the strings are so tiny that you never perceive the

vibrations directly, only their consequences. To understand these vibrations, you have to understand a classical type of wave called a standing wave — a wave that doesn't appear to be moving” - www.dummies.com

As far as the SOUND of the Universe is concerned, modern sciences are now catching up with this information as well. NASA has recently recorded the sound of Sun produces its own sound. (Recording of the sound of the Sun <http://www.telegraph.co.uk/news/science/space/7840201/Music-of-the-sun-recorded-by-scientists.html>) In fact each and every planet and star in the Universe has its own sound and the sound of all these planets and stars put together like an orchestra sounds like AUM or OM. In fact if you hear the clipping of the sound of the Sun above, this sound itself sounds like the revered Hindu symbol of AUM or OM.

In fact, the importance of sound and vibration has recently again been re-established by a study which proves that the human DNA can be reprogrammed by words and frequencies. (Ref. <http://www.collective-evolution.com/2011/09/02/scientist-prove-dna-can-be-reprogrammed-by-words-and-frequencies/>) In fact, the names of Hindu Gods and Goddesses are said to have been specially designed for this purpose and that is why the devotees are asked to chant the names of the Gods and Goddesses.

Jai Shri Krishna

COW : Here I would also like to add, that the concept of saving Gaia or cow as taken in Hinduism to mean the animal cow, could be a misunderstanding, since the word ‘Gaia’ (sounds similar to Gaia/cow as pronounced in Hindi) in Greek Mythology refers to the Planet earth, so it is possible that the message conveyed by Lord Krishna

was to save the planet earth/Gaia from the pollution we are causing and not the animal.

In Sanskrit itself, the term “*Gau*” is used for both the planet earth as well as the animal cow.

Now, the question that might come up is, how can a concept of Greek Mythology be inculcated into Hindu Mythology? The answer is simple, as explained in Chapter one, after the great cataclysmic of the last ice age the survivors of the previous civilization spread out through whichever parts of the world they could find and established civilizations in those regions again. This also explains the vast similarities in various religious practices in many ancient civilizations around the world.

(For more information please see this link for the use of the term Gaia in Greek Mythology :-Goto the website www.wikipedia.com and in the search window type the following words WITH THE INVERTED COMAS “Gaia (mythology)” or else click on the following link http://en.wikipedia.org/wiki/Gaia_%28mythology%29)

SIDDHIS AND NIDHIS

Now, the question that arises for our consideration is, what are the powers that can be obtained by practicing these Ancient Sciences.

Now, to further elaborate on these Adhyatmic sciences (Sciences of the Soul), you would recall that in the Hanuman Chalisa there is a line "Asht Siddhi Nau Nidhi ke daata As Var Deen Janki Mata", means Lord Hanuman is the master of Eight Siddhis and Nine Nidhis. Now what exactly do we mean by these Siddhis and Nidhis? Now what are these Siddhis and Nidhis, i will be coming down to this, however, in the meanwhile i would like to say that the Ancients had developed these Adhyatmic powers (Powers of the soul) with two main objectives in mind, the first objective was to make human interaction on this planet to not be of the parasitic nature that it is, you know the way the human existence on this planet today is of a parasitic nature,

these sciences aimed at changing that, and the second reason for which these powers were developed were to obviously gain exceptional powers which a human would not ordinarily gain.

The powers that can be obtained by these sciences are called *Siddhis* and *Nidhis*

Now I am going to go through this list of Siddhis and Nidhis, the eight Siddhis are

- (1) Anima- Reducing one's body to the size of an atom
- (2) Mahima- Increasing the size of one's body into an infinitely large size
- (3) Garima- Which means being infinitely heavy in weight
- (4) Laghima- means becoming almost weightless
- (5) Prapti- means having unrestricted access to all places, this is something that Lord Narada has, the ability to go anywhere in the Universe
- (6) Prakamya- means realizing whatever one desires
- (7) Istva- means possessing absolute lordship
- (8) Vastva- means the power to subjugate all.

Now, Five siddhis of yoga and meditation as given in the Bhagavata Purana are, the five siddhis of yoga and meditation are:

- (1) trikālajñatvam: knowing the past, present and future, which is a Trikaal Darshi Rishi as i have mentioned earlier.
- (2) advandvam: tolerance of heat, cold and other dualities, so you see making human body independent of the climatic conditions around it. This is a part of what was mentioned earlier, a part of the Ancient Sciences which made human dependence on the planet to not be of

parasitic nature. So the first thing you see is, they developed a science so that the climatic conditions around the human do not affect him

(3) para citta ādi abhijñatā: knowing the minds of others and so on

(4) agni arka ambu viṣa ādīnām pratiṣṭambhaḥ: checking the influence of fire, sun, water, poison, and so on

(5) aparājayah: remaining unconquered by others

Now ten secondary Siddhis mentioned in the Bhagavata Purana are,

Ten secondary siddhis given in the Bhagavata Purana, Lord Krishna describes the ten secondary siddhis:

(1) anūrmimattvam: Being undisturbed by hunger, thirst, and other bodily appetites. So you see this is the second example of making human body independent of the resources of the planet, one is where the human body is undisturbed by the climatic conditions of the planet and the second one is where the human being is undisturbed by hunger, thirst and other bodily appetites, ok, so you can imagine that a person who does not need food, does not need water, who is unaffected by the climatic conditions around him, you can imagine that his existence on this planet would not be that dependent on the resources of the planet as a normal human being. Now next one is,

(2) dūraśravaṇa: Hearing things far away, now this Siddhi of Dursravana is a Siddhi that Mr Nikola Tesla seems to have had, it is mentioned in his autobiography "My Inventions" that he could hear things from 20 feet away and since he was a karma yogi he had developed these powers.

(3) dūradarśanam: Seeing things from far away,

(4) manojavah: Moving the body wherever thought goes. Now please pay attention Manojavaha is the power to move the body wherever the thought goes, now this power, this moving the body wherever the thought goes it menas travelling faster than the speed of light, you know, one can be sitting here and think of Mars and be there in a

matter of half a second, you know, less than half a second, you know, so what we are talking about here is a speed that is faster than the speed of light which is the speed of thought. (teleportation/astral projection)

(5) kāmārūpam: Assuming any form desired

(6) parakāya praveśanam: Entering the bodies of others

(7) svachanda mṛtyuh: Dying when one desires, Bheeshma Pitamah (a mythological character from the epic Mahabharata) had this power.

(8) devānām saha krīḍā anudarśanam: Witnessing and participating in the pastimes of the Gods

(8) yathā saṅkalpa saṁsiddhiḥ: Perfect accomplishment of one's determination

(9) ājñāpratihatā gatiḥ: Orders or commands being unimpeded

So these are the various powers, the various Siddhis and Nidhis, these are the major Siddhis and Nidhis which are part of the powers that were developed by these sciences of the soul.

PRACTICAL APPLICATION OF ANCIENT SCIENCES

Now, if i was to discuss the practical application of this knowledge. We have already discussed that these Ancient Hindu texts are the knowledge database of entire humanity passed down to us by the survivors of the Great floods of the Last Ice Age. As already discussed, this Ancient civilization survived on earth for at least twice or thrice as long as our civilization and had that much more time to develop their sciences. These sciences are thus thousands of years ahead of us. Once this goldmine of knowledge of Ancient Sciences comes to light, we will truly understand the relevance of our History for us even today.

The most beautiful aspect of these sciences is that these sciences also have an aspect to themselves that can make a human being independent of the resources of the planet. So instead of having a parasitic relationship with the planet wherein we are dependent on the planet for everything, the human can actually be completely independent of the planet and share a nurturing bond with it as I am going to show you now. Firstly, it is quite clear that if we study these Ancient Scriptures, our sciences can take a leap forward by atleast 300 years if not more solely because of the fact that these Ancient people had access to the ends of the Universe with the help of the technique of Astral Body Projection and thus a lot more knowledge than us in the fields of physics, chemistry etc., if we study these scriptures we can even rise above the need for food and the need for woollen clothing and the need for water. These Ancient people had found out ways to make humans independent of the basic human needs of food and clothing. They had developed ways to make human body survive by simply consuming air, i,e by deriving nutrition from air itself. This knowledge is still alive and can be accessed on yogi Ray Maor's website www.10dayprocess.com. Now you may recall that the story of Lord Krishna's parents Vasudev ji and Devaki ji who survived only on air during their tapasya (Penances), after which Lord

Krishna blessed them that he would be born as their son in their next life.

Now similarly, the human body can also be nourished with the help of the Sun's rays, so we are not only dependent on food for our energy we can also derive energy from the Sun's rays, and you can access this information regarding how to nourish your body with the help of Sun's rays from website www.solarhealing.com . If you are sceptical about this ability of the human body, you can google the name of Mr Prahlad Jani, he is a yogi who is around 70 years of age and he has not eaten anything since he was 7 years old and he has spent 10 days before the cameras 24X7 remaining before the cameras to prove this, to prove the fact that he does not eat anything and does not drink water and still survives. Similarly Mr Ray Maor, the Prana Yogi who only survives on air has also spent 7 days in front of the camera 24X7 to prove that human body can survive by taking nourishment only from air. Similarly, Mr Wim Hof, who is popularly known as the Ice Man by the media is a man who holds several records for surviving in sub-zero temperatures, and he says that he had learnt this technique of surviving in sub-zero temperatures from an Indian yogi. and he has given out the details about how to get into this practice, how to become an Ice Man in his book "Becoming An Ice Man". The only problem with the Adhyatmic Sciences or the sciences of the soul at present is that as the number of souls in the Universe increases, the powers of each individual soul keeps on decreasing, so what was easy for people to do in Ancient times with the powers of their soul, is not that easy for us to do today. We, therefore, need to use the information already available with us in these Ancient Sciences as the foundation of our modern sciences and build our sciences from there.

So you see if we go back to our scriptures our sciences can take a leap forward by atleast 300 years because the entire branch of present day sciences called Rocket Sciences can be replaced by a much simpler and more efficient sciences of Astral Body Projection, we can rise

above the need for food, the need for woollen clothing, and the need for water as well.

Now over here i want to add one small thing, what is individual "Dharma", going a little away from the sciences, i want to bring forward one thing, what is individual Dharma? Now the Definition of Dharma as has been given by Dr Steven Greer in his book " Hidden Truth Forbidden Knowledge" is that every individual created being has a certain optimal point of service and an optimal role to play that is in consonance with their own unique self, so every human being has been given a few characteristics, a few personality traits, a few skills by God, which we are supposed to develop throughout our lives and it is only when we develop these skills that God has already planned for us and God has already given us that we are able to achieve an optimum combination of how to spend our life on earth, how to be productive to the best of our own ability while living on this planet and i don't just mean productive in the work sense, emotionally also, because work also somewhere affects your emotional health.

For example, if i was to give you an example, if Sachin Tendulkar or Don Bradman were made to play football they might not be as good at playing football as they would be at playing cricket because that is their optimal combination, ok. Now there has been a recent study which says that even if a person spends 10,000 hours, practicing something, it is not necessary that he will become an expert at it. Now the reason for that is that even if you are putting in 10,000 hours and practicing something that you are not meant to do, you know that is not your optimal combination, then even after spending 10,000 hours you will not succeed in perfecting that art, because God has already given us inbuilt set of skills that we are supposed to develop.

THE GOLDEN AGE HAS ARRIVED

Now you must have heard about the 2012 prophecy, in December 2012 there was this great commotion about a Mayan prophecy that the world will come to an end in December 2012. So what is a little known fact is that its not just the Mayans who had talked about the world coming to an end in 2012, even in our Brahmavrat Purana, it is written in a conversation between Lord Krishna and the Yamuna river, Lord Krishna told river Yamuna, since River Yamuna was distressed by the state of the human society, she asked Lord Krishna when the human beings will be able to see the light of reason, when they will get some relief from this Kali Yuga and Lord Krishna had told River Yamuna that from February 2013, the human beings will get some relief from the Kali Yuga because the dawn of the age of information, the age of knowledge will come back. So if you want some more details about this prophecy about 2013 in our Puranas, you can go to the www.youtube.com and you can see channel Dharmanation's video "Coming Golden Age", the channel's name is Dharmanation and the video's name is 'Coming Golden Age'.

What exactly is Kali Yuga, it is the “state of human consciousness”, what is a little know fact today is that the thoughts of human beings are recorded all recorded by Mother Earth and the collective state of human consciousness is decided accordingly. When we say to some good smartian today that “insaniyat tumhari wajah se hi zinda hai” (Humanity survives today because of people like you) it is a Adhyatmic Fact. There is an actual chart in the calculation of this human consciousness, where each human being inclined towards goodness outbalances thousands of those inclined towards negativity and thus the state of human consciousness is decided.

So what can we do to end this Kali Yuga, all that we are supposed to do, in order to end this Kali Yuga is that we are supposed to wish each other well, once all human beings on earth start wishing each other well, and start praying for the betterment of the entire human race, this Kali Yuga will come to an end itself and the scales of collective human consciousness will tilt towards the Golden Age. You will be glad to know, this process has started since December 2012. You can also download the mantra 'Sarvesham Swastir Bhavatu' from www.youtube.com , its a mantra praying for betterment of entire humanity and play it everyday and wish well for all humans.

If you want to know more about this topic of Ancient Sciences, i would request you to go to Google and search for Dr Steven Greer's article "How to Use Mantra", this is an article by Dr Steven Greer "How to use mantra" in which he has explained in detail where we are going wrong in reciting the mantras. Then again we can go back to www.youtube.com and search for the video "Dr Steven Greer: Contact, Disclosure and Free Energy" this is a video in which Dr Steven Greer has explained the condition of the planet as it exists today and where we are headed and what we need to do, to overcome the problems faced by the planet today. Of course you please read Dr Steven Greer's book "Hidden Truth Forbidden Knowledge" this book is available for free download on the internet. Please read this book 'Hidden Truth Forbidden Knowledge' because it clarifies the basic fundamentals that we don't understand today about Hinduism, about the sciences that are given in our Ancient Scriptures. Besides watching videos by Mr Gregg Braden and Bapuji Dashrathbhai Patel on Ancient Sciences.

So to conclude if we can bring forward the sciences and the information contained in the Ancient Hindu texts, it could be Hinduism's greatest gift to humanity. Therefore, please understand, the vision of these Ancient people which covers the mysteries of the entire Universe is not limited to a single country, or to any petty ideas of nationalism or religion that demeans the others. The vision of these

Ancient people is very grand and covers the entire Universe and the Multiverse as is covered in these beautiful words "Vasudhaiv Kutumbakam" (the entire Universe is my home) this is the ideology and this is what we need to follow in order to bring about this Golden Age on this planet.

Jai Shri Krishna

THE GODS OF HINDUISM

We have at this point in discussing the WHO, WHEN WHERE and WHAT, of Hindu mythology discussed the miracles discussed in Hindu Mythology. We shall now therefore, discuss the Gods of Hindu Mythology.

HINDU MYTHOLOGY

WHO THE GODS REALLY ARE

Now that we have discussed the background in which the science and technology referred to in our ancient texts existed in Ancient Times, let us now delve into a more mysterious aspect of our mythology i.e the innumerable references in our Ancient Scriptures to Devas or Gods with whom the Ancient Man was constantly in contact with and who regularly guided him and helped in times of need.

There are two types of Gods that were worshipped by the Ancient man. The first type are the Gods of nature like the Earth (dharti Mata), Wind (Pawan Devta), Sun (Surya Devta) and Krishna as the 'Entity of the Universe'. I will be further elaborating on the second type of Gods

later, presently I shall continue the discussion about Krishna being the Entity of the Universe the Universe.

To take the view of Lord Krishna being the entity of the Universe further, Chapter 11 of the Shreemat Bhagwat Geeta English translation by ISKCON (International Society for Krishna Consciousness), the Chapter 11 in which Lord Krishna shows His “Viraat Avatar” to Arjuna on the battle field, the Chapter itself is titled “The **UNIVERSAL** Form’.

To give you some quotations from Chapter 11 to bring the point further:-

- *You are the origin without beginning, middle or end. You have numberless arms, and the sun and moon are among Your great unlimited eyes. By Your own radiance You are heating this entire universe.*
- **ALTHOUGH YOU ARE ONE, YOU ARE SPREAD THROUGHOUT THE SKY AND THE PLANETS AND ALL SPACE BETWEEN. O GREAT ONE, AS I BEHOLD THIS TERRIBLE FORM, I SEE THAT ALL THE PLANETARY SYSTEMS ARE PERPLEXED.**
- *The Blessed Lord said: My dear Arjuna, happily do I show you this **UNIVERSAL FORM WITHIN THE MATERIAL WORLD** by My internal potency. No one before you has ever seen this unlimited and glaringly effulgent form.”*

In the second paragraph above, you can see that Arjuna describes what He sees as Lord's Viraat Avataar as "*You are spread throughout the sky, the planets and all space between*". Now, what do we call the area that covers the planets as well as the '*space between*' isn't this the essential definition of the Universe?

The Lord is the Universe itself, and we are nothing but small cells on the body of the Universe. We are all a part of His body and that is why we say Lord is OMNIPRESENT, WITHIN US and OUTSIDE US. The way we can't say that we love our right hand more than our left hand similarly, He does not love and one person more than the other because we are all part of His own body.

There are two popular misconceptions about Lord Krishna's leelas, firstly, it is well known to anyone who has a keen interest in mythology that all of Lord Krishna's 16,000 wives were all captives of a demon called Narkasura and after releasing them from captivity, Lord Krishna had married them all on their request, since after their release from captivity of Narkasura, the society was not ready to accept them.

Second popular misconception about Lord Krishna is about His Raas Leelas. Now, as already discussed earlier, the Universe is based on sound, every individual within this Universe, every human being also has a sound or sur of this own and the one's who are out of synchronicity with the sound of the Universe are very aptly called "A-Sur" meaning ones without the "Sound" or the ones out of tune with the Universe. So what Lord Krishna was doing in the Raas Leela was that He was playing the sound of the Universe with His Bansari or flute and as a result of the creation of this cosmic sound, the Gopis who were all Rishis in their previous lives used to hear the sound of the Universe and the sound of their souls and used to come rushing to Lord Krishna. Those who could not make it because of being locked up in their houses used to come to meet Lord Krishna in their Astral Body Form.

Now read the last paragraph that has been quoted from the Shreemat Bhagwat Geeta above, "***My dear Arjuna, happily do I show you this UNIVERSAL FORM WITHIN THE MATERIAL WORLD***" now what does He mean by saying that this is His form "*Within the*

material world”?. What he means by this is that within this material world or Maya He can be perceived as the Universe itself, however, beyond this material world He is “Devine White Light”.

In His encounter with Maharaj Muchukand whom Lord Krishna woke up from his sleep of hundreds of years in order to get Kaal Yavana killed by Maharaj Muchukand. After Kaal Yavana is killed Lord Krishna shows His Devine White Light Form to Maharaj Muchukand, which is actually His form beyond the realms of Maya.

This very Devine White Light is worshipped as “Nirakaar Paar Brahm Parmeshwar” as well. It is this very Devine White Light that is referred to as “Shiva” in our Ancient Scriptures. We often mix up Lord Shiva with Lord Shankara which is a cause of major confusion in Hinduism, Lord Shiva is formless whereas Lord Shankara is the Saakar form or the form with body.

PRACTICAL PROOF THAT ALL RELIGIONS WORSHIP **ONLY ONE GOD**

It is this very Devine White Light which is the common thread that runs through all the religions, so when you hear people say that there is Only One God, they are telling the truth, not making a philosophical statement.

This very Devine White Light is worshipped:-

In Hinduism as “Nirakaar Paar Brahm Parmeshwar”

In Islam as “Allah ka Noor”

In Christianity as Yeshua, or point of light

In Sikhism as “Akaal murat”, Sikhism in fact has one of the longest chapters dedicated to explaining this Devine White Light in the Sikh religious text Gurbani.

In fact, even in Ancient Egypt, this Devine White Light was worshipped as God “Aten”

In Yoga, is it considered to be the greatest fruit of yoga if in a state of meditation a yogi is able to see this Devine White Light after opening of the seventh or the highest chakra. This state of witnessing the Devine White Light while meditation is called “*Brahm Sakshatkar*” in yoga.

So, you see the chore of the matter is that irrespective of their religion, caste, race or colour, if all humans were to sit down and meditate seriously, all of us can see this Devine White Light within ourselves, because all of us are one and there is LITERALLY, PRACTICALLY, ACTUALLY ONLY ONE GOD.

THEREFORE, PLEASE PAY ATTENTION TO THE INFORMATION ABOVE, AND PLEASE REALISE THAT ALL RELIGIONS ARE THE SAME AND EACH TIME WE DEMEAN ANY OTHER RELIGION WE ARE JUST BEING FOOLISH

SECOND TYPE OF GODS WORSHIPPED IN HINDUISM

To understand who the Second type of Gods that are worshipped in Hinduism are, we need to analyse a few things about the Gods that we worship. Lets see what we really indisputably know about the Gods that we worship.

Q1. Are they humans?

A. No

Q2. Where do the Gods live?

A. In the skies/ not on Earth

Q3 What do they come to Earth for?

A To help mankind

Q4 How do they help mankind?

A. By giving us advanced technology and various magical bounties which defy the laws of nature as we understand them.

Who are these various entities referred to in our Ancient Texts as:-

Yaksha,

Gandharva,

Naag,

Kinnar,

Apsaras

Lord Indra

Now, lets think about it, when our thousands of years old religious texts tell us that Gods are non-humans who live somewhere in skies, descend from the skies for a specific purpose, i.e to help mankind

with advanced technologies and go back to their abode in the skies when their purpose is fulfilled, whom are they talking about?

As rational human beings and putting together the knowledge that we have gained today through our sciences, the answer to the first question itself should tell us who the Second type of Gods are.

Yes, they are Extra-terrestrial beings who help mankind in every way they can in order to make sure that mankind fulfils its ultimate destiny of becoming a peace loving society like them and humanity can bring out the divine element that is hidden within them.

The most interesting part of this information is the fact that our Ancient texts very openly and clearly tell us about these beings as not non-humans who used to go back to their lokas or star systems. It is only our present day mental conditioning that stops us from seeing this clear fact.

The various entities referred to in our Ancient Texts as

Yaksha,

Gandharva,

Naag,

Kinnar,

Apsaras

Lord Indra

are all beings from other planets and galaxies who used to visit earth regularly and engage with the inhabitants of the planet.

Another example of the writing on the wall clearly spelled out in our religious texts, is the story of Kaal Yavan's father Rishi Sheshirayan. To put it very concisely the story goes like this, Rishi Sheshirayan married an 'APSARA' from 'another world' and together they had a child named Kaal Yavan, when Kaal Yavan was very young his mother had to leave him in the custody of his father and GO BACK to her "Loka" because she "could not stay on the prithvi Loka for too long" (the atmosphere was not conducive to her existence beyond a certain period).

(For more information goto the website www.youtube.com and type the following words WITH THE INVERTED COMAS “Ramanand Sagar’s Krishna Episode 33” or click on the following link <https://www.youtube.com/watch?v=ekekxdt1c4o&index=33&list=PLbPRvu-licFLbRsiOWMFGpPbwXRhicH3>)

The system of Maha Manavtantra in Hinduism, when it says that 6 months of humans (Uttarayana and Dakshinayana) is equal to one day of Gods, they are actually referring to the way the time passes on these other galaxies.

Again we can refer to the story of Maharaj Muchukand who went to the Swarga Loka/Galaxy to help the Gods in a fight, he fought there for a period equivalent to 1 year of Swarga Loka and by the time the war was over 100 years had passed on earth and his entire empire and loved ones had moved on. Thus showing that there are galaxies where time passes more slowly than here on earth.

(For more information to see the story of Maharaj Muchukand Goto the website www.youtube.com and in the search window type “Ramanand Sagar’s Krishna Episode 34” WATCH THIS EPISODE OF SRI KRISHNA FROM 40 MINUTES ONWARDS or click on the following link <https://www.youtube.com/watch?v=SHCSWTRpu0c&list=PLbPRvu-licFLbRsiOWMFGpPbwXRhicH3&index=34>)

There are several references in our religious texts about various Extra-Terrestrial species like Gandharva- Who are CLEARLY referred to as “celestial beings” in all our religious texts, how much more proof do we want of this.

The various species of ETs who were present on Earth at that time are repeatedly mentioned in our religious texts as Yaksh, Gandharva, Naag, Kinnar.

We also have further evidence of these ET’s having children on Earth. Greek hero Hercules was the son of ‘God’ Zeus and human woman Alcmene, meaning thereby that he was born to a human mother and ET father.

There is an entire series on history Channel called the ‘Ancient Aliens’ where they shows proofs from around the world that humanity has been visited by ETs since time immemorial.

These Extra-terrestrials are so clearly and openly mentioned in our scriptures that we even have Ancient stone carvings and reliefs clearly depicting Nagas changing shape from Snake to Human.

At Mahabalipuram, Tamil Nadu, we have the world's second largest relief "Arjuna's Penance" (picture on the next page) a stone carving which clearly depicts a snake coming out from the ground and changing shape into a human.

If you look at the relief closely the central of the relief clearly depicts a snake coming out from the ground which is in its original form in the beginning and changes form to human as it comes up.

ARJUNA'S PENANCE MAHABALI PURAM, TAMIL NADU

In fact, below the Ellora Caves in India there is an entire hidden network of tunnels used by the Nagas which has still not been discovered by the Archaeologists. If you visit the Ellora caves, in Maharashtra, you will find several air shafts on the floor of the caves to allow oxygen to reach underground and several underground tunnel opening all around the caves which are lying in neglect without anyone bothering to investigate them.

(For more information please go to www.youtube.com and watch the video “Secret Underground City of Ellora Caves- Ancient Aliens in India?” by Phenomenal Travel Videos channel).

For anyone, who still has doubts that Hinduism has anything to do with the Extra-Terrestrials, Dr Steven M Greer; a country doctor in America; (who i personally believe is an Ancient Rishi reborn) has established an organization called CSETI (Centre for Study of Extra-Terrestrial Intelligence) where he teaches the **ANCIENT VEDIC PRACTICES** to contact ETs to the common public.

Dr Greer says that after reading the Vedas, he has found a way to contact the ETs and get them to visit the planet with their Crafts. He often takes out groups of people to open lands where he performs a Puja and then through yogic methods he gets his astral body to float into the Universe, locate the ET crafts and requests them to visit our planet. Dr Greer has succeeded in calling the ET spacecrafts innumerable times. This man has been working tirelessly to allow humanity to realise its potential. He has also in 2013 released one of the biggest public funded movies on ETs called ‘Sirius’.

This is a video where Dr Steven Greer explains how he uses Vedic techniques to contact extra-terrestrials.

THE LAW OF KARMA

There are various galaxies and star systems in the Universe which have circumstances far better than what we face on this planet earth, there are planets which have no diseases, no wars, as per our scriptures no one grows old in “Dev Lokas”. There are however, certain laws of the Universe applicable to all souls entering these galaxies or planets, the laws are called the laws of “*Karma*” the souls in their previous lives should have conducted themselves in a certain manner to qualify to be born on these better planets. Our religions are here to guide us on these ways to conduct ourselves on this planet so that we can qualify as advanced souls and be born in better circumstances on other planets hereafter. I will further elaborate on this in the next Chapter.

The ultimate goal for humanity is to become a peaceful society that loves and cares for each other. The day we are able to achieve this goal, we will be allowed to go out into the universe and help other planets reach their full potential as a peaceful society. The Vedas have been provided to humans for this very purpose, remember the Vedas are described as “Apurushaya” means ‘not of human origin’, since they have been given to us by these Extra Terrestrials to help us evolve.

THE ACTUAL SECRET OF THE JOURNEY OF THE SOULS

Vedic description of the Universe tells us about 7 lokas or 7 Star Systems. These Lokas or Star systems are 1. Satya Loka- Abode of Brahma 2. Tapa Loka-Abode of the Ascetics 3. Jana Loka 4. Mahar Loka 5. Swar Loka 6. Bhuvar Loka 7. Bhu Loka.

What we actually mean by the journey of the soul is the laws of the Universe which allow a certain type of souls to reside in a certain type of a Galaxy based on its previous Karma. Now this is the reason why all the religions around the world pay so much emphasis on regulating our behaviour on this planet, because once our life on this planet ends our souls go over to the other planets in other galaxies according to their Karma.

This is the valuable knowledge being imparted to us for the benefit of mankind in the form of the knowledge of the journey of the soul in all religions today.

For those critics who would say that there is no soul, I have this to say. All the ancient civilizations around the world tell us stories like the story of Noah from the Bible and the story of Manu from Hinduism which tell us about various flood myths, about how there were cataclysmic floods in the past which swept away entire human civilizations and the survivors of the floods had to start civilization from a scratch. Till date historians refuse to believe these stories dismissing them as myths, however after the discovery of Dwarka city 100 feet under water as stated previously, these myths have been proven to be true. The reason for dismissing these stories as myths was that we did not have the equipment to search the floors of the ocean 100 ft under water at that time when these stories were declared to be myths in early 20th century when present day modern history was being written and therefore due to lack of technology, since these theories could not be proven, they were dismissed and a wide gap was created between mythology and history which has not been filled even today. But today when we have the technology to search the depths of the ocean, the truth has come out by itself.

Similarly, all the religions around the world talk about the existence of the soul and ask us to live our lives in a manner that would be

beneficial for the soul, but the modern sciences yet again dismiss the idea of a soul, saying that there is no proof of it. The fact of the matter is that we don't have the requisite technology to prove it yet, but that does not mean that the soul does not exist. However, we cannot wait for the modern sciences to catch up on this information because humans are living their lives every day and need to follow the rules for the soul in order to attain a better afterlife.

Now, the question arises, that if ETs are here to benefit humanity then why don't they come forth and reveal themselves the way they did in Ancient times. The answer to this question that I can understand is that if we jog our memory back, up to the time of Lord Christ, the occurrence of miracles was quite common. After the time of Jesus these open interactions stopped. The fact that Lord Jesus himself was born through Virgin Mary without any male contribution was easily believed by the general public of the time shows that these miracles were common place, in addition to this there are various reference to voice coming from the sky and telling people that Jesus was a favoured Son of God. However, after the time of Lord Jesus, these open miracles stopped and we do not have much record thereafter of any miracles occurring openly where God descended on earth or there were any voices talking from the heaven. Therefore, in my understanding, these open interactions with ETs stopped due to the way we treated Lord Jesus Christ.

Therefore, from this we can see that though we still have access and guidance from up above which comes in our dreams/through telepathy etc., we still cannot interact freely with them in the physical world because of the inhumane treatment given by us to Lord Jesus despite the knowledge of the fact that he was here to help us and to help humanity reach its ultimate goal and yet the way we treated him lead them to be wary of us. This is not to say that Lord Jesus was an ET but only to say that when we treat someone who comes with a message of love so badly, what would anyone looking at us think. Even today if we see an ET aircraft, the first thing that we will do is probably to shoot it down. Therefore, as man has grown powerful over a period of time he has also grown violent and this is the reason why they only interact directly with people like Dr Steven Greer mentioned above who convey a clear message of peace for humanity.

Now think about the message that Lord Jesus Christ brought with him, he said we should share; “if you have two shirts, give one to the man who has none”. Humans decided not to follow his advice, now think about it, what was the attitude that was the root cause of colonialism and ultimately the two world wars, to sum it up in one line, the attitude was that ‘if i have 2 shirts and the other person has one i want his shirt as well, i don’t care if he has none left to wear thereafter’. If we had followed Lord Jesus Christ’s advice when he gave it, there would have been no colonialism and hence World War-I and World War-II could also have been avoided. It would have saved humanity a lot of grief, but alas we chose to ignore his advice.

These messengers of God know the direction in which humanity is headed and therefore, always come down on this planet to guide us in the right direction.

So, this is the INTERGALACTIC ANCIENT HINDU, whom we have been trying to understand since thousands of years.
