**2N2869/**  
**2N301**

Germanium p-n-p type used in a wide variety of af power-amplifier and large-signal applications in commercial, industrial, and military equipment. It is used in class A and class B af-output-amplifier stages of

automobile radio receivers and mobile communications equipment. It provides excellent dc-to-dc and dc-to-ac power conversion. This type features high breakdown voltage, low saturation voltage, high large-signal beta, and a high dissipation capability. JEDEC No. TO-3 package; outline 5, Outlines Section.
